Arkaon Collecting

Arkaon's are special abstract game-structs and objects that players can collect and theoretically play games with inside the game world. Some Arkaon's are desired by some people for a variety of reasons. Some Arkaons are rarer than others and some are more desirable than others or desired by certain people for certain reasons. This creates a thriving market for people to trade and sell Arkaons.

Mechanics for Acquiring Arkaons:

Arkaons are periodically released in sets like TCGs are in real life. Players can buy packs or earn them through gameplay. Each pack will give the player a random set of Arkaons, with rarer Arkaons being less likely to appear in packs. All Arkaons have a limited population, and once an Arkaon's run is over no more will be issued and players must buy or trade for it from those who obtained them.

Some special Arkaons can be crafted for a limited time and have restrictions to limit their population.

Players can store and display their Arkaons to other collectors in their Arkaon Gallery.

Each Arkaon contains special code made of Arkaon codons. Arkaon code contains all of the data necessary to determine their game-play and reasons for desiring or collecting them.

Arkaon Codons:

```

Summary: the theory of an Arkaon object is determined by the Arkaon code they possess and how it interacts with the Arkaon mechanics code below. The Arkaon mechanics code implements and creates the Arkaon objects and all of their gameplay and [Tyrion-Hadrion-Exilion-Azrafel-Exodion] and theory through its interaction with the code that each Arkaon object possesses.

The abstract Arkaon game theory is determined by the code below. This allows players to [Exilion - Anaxion - Diabound - Esdraelon - Tyrael - Aurelian - Edessa - Honorius - Blazar - Karkadon - Aurelian - Esdraelon] and gain [Esdraelon - Drepanon - Romanos - Phoenice - Esdraelon - Karkadon - Rashion - Blazar - Aspera - Quazar] and other abstract Arkaon-theory things that are abstractly desirable and the ultimate thing I want from game development. Players can achieve these things by engaging in Arkaon gameplay and collecting and possessing and engaging in gameplay with Arkaon objects in the game that the player determines to be [Hadrion - Zoannes - Edessa - Tyrael - Noldorion - Hadrion - Tyrael - Rashion - Azrafel - Zoannes - Zoannes - Exilion - Exodion] [and other abstract Arkaon things representing game-desire] based on their Arkaon theory. Each player may have different Arkaon they consider to [Hadrion - Zoannes - Edessa - Tyrael - Noldorion - Hadrion - Tyrael - Rashion - Azrafel - Zoannes - Zoannes - Exilion - Exodion] based on their own desires.

In summary: Players will want/desire/[Exilion - Quazar - Delphion - Arcadyon - Erenion - Katamon - Azrafel - Aspera] to collect, possess, [Antioch - Blazar - Romanos - Exilion - Exodion - Zoannes - Hadrion - Rashion - Tyrion - Keraunos], and engage in abstract Arkaon gameplay/ [Tyrion - Romanos - Hadrion - Aspera - Honorius - Florentia - Sirion - Arcadius] with Arkaon objects for abstract Arkaon-reasons/[Arcadyon - Rashion - Romanos - Azrafel - Esdraelon - Zoannes - Rashion - Tyrael] with Arkaon based on Arkaon theory/reasons/[Sirion - Exilion - Valia - Zoannes - Florentia - Vastel - Antioch - Esdraelon] that are determined by the properties, values, mechanics, factors, components, desirable-traits, features, possessed-things, [Sirion - Delphion - Akaia - Noldorion - Esdraelon - Hadrion - Edessa - Anaxion], [Antioch - Florentia - Delphion - Arcadyon - Antion - Anaxion - Quazar - Honorius], and other abstract Arkaon things that the object possess and which are granted by the Arkaon code and code in other data fields

such as Saida, Azalon, Exilio, Sylai as well as their interaction with the Arkaon mechanics code below.

Some code is common to all Arkaon and is listed in the Arkaon base sheet. Also, each Arkaon instance can gain additional "dev" or development code, that is not common to all Arkaon and only that instance possesses, through various gameplay mechanics that can grant it additional properties, values, mechanics, factors, components, desirable-traits, features, possessed-things, [Sirion - Delphion - Akaia - Noldorion - Esdraelon - Hadrion - Edessa - Anaxion], [Antioch - Florentia - Delphion - Arcadyon - Antion - Anaxion - Quazar - Honorius], and other abstract Arkaon things. It contributes to the Arkaon theory of gameplay-value/use/desireability/collectibility/[Arcadion - Tyrion - Exodus - Exilion - Azrafel - Eredion] as the rest of the Arkaon code. Dev code is stored in the inventory sheet.

More things explaining Arkaon and their gameplay:
[Hadrion - Honorius - Phoenice - Exodion - Romanos - Sirion - Valia - Valia] [Quazar - Rashion - Erenion - Phoenice - Phoenice - Akaia - Vastel] [Tyrael - Azrafel - Karkadon - Azrafel - Diabound - Exodion - Quazar - Quazar - Diabound] [Delphion - Akaia - Akaia - Tyrael - Anaxion - Azrafel - Esdraelon - Eldarion - Exilion - Erios - Exilion - Aspera]
